Integra LifeSciences launches Revize™/ Revize™-X Collagen Matrix for Plastic and Reconstructive Surgery

Revize and Revize-X are collagen matrices for plastic and reconstructive surgery, derived from fetal bovine dermis, available in solid and 2:1 meshed configurations

PLAINSBORO, N.J., Oct. 06, 2017 (GLOBE NEWSWIRE) -- [Integra LifeSciences Holdings Corporation](#) (Nasdaq:IART), a leading global medical technology company, today announced the launch of Revize™ / Revize-X™ Collagen Matrix, its latest offering in tissue-building solutions for plastic and reconstructive surgery. Revize and Revize-X are derived from fetal bovine dermis, which is rich in Type III collagen. Revize-X is an expandable matrix that provides up to twice the initial coverage area once hydrated and fully expanded. It features a meshing pattern which allows for vascular ingrowth and increased conformability.

"The Revize and Revize-X products provide new, innovative solutions to plastic and reconstructive surgeons for use in their private practices. Our entry into this space will provide surgeons with leading edge technology for patients undergoing cosmetic revisionary procedures," said Robert T. Davis, Jr., corporate vice president and president, Orthopedics and Tissue Technologies.

About Revize and Revize-X

Revize / Revize-X is intended for implantation to reinforce soft tissue where weakness exists and for surgical repair of damaged or ruptured soft tissue membranes. Revize / Revize-X is specifically indicated for plastic and reconstructive surgery.

About Integra

Integra LifeSciences is dedicated to limiting uncertainty for clinicians, so they can concentrate on providing the best patient care. Integra offers innovative solutions, including leading plastic and regenerative technologies, in specialty surgical solutions, and orthopedics and tissue technologies.
