

Integra LifeSciences Marks 20 Years of CUSA® Technology with Liver Surgery Education at ACS Clinical Congress 2026

Sep 25, 2026

Company to feature surgeon-led educational programming and technologies supporting liver surgery

PRINCETON, N.J., Sept. 25, 2026 (GLOBE NEWSWIRE) -- Integra LifeSciences (Nasdaq: IART) will mark 20 years of CUSA® technology within its portfolio at the American College of Surgeons (ACS) Clinical Congress 2026, taking place September 26-29 in Washington, D.C. The company will feature surgeon-led educational programming focused on liver surgery, including presentations and clinical discussions featuring the CUSA Clarity Ultrasonic Surgical Aspirator System and MicroFrance® laparoscopic surgical instrumentation.

As part of ACS's Innovation Theater programming, Integra LifeSciences will feature presentations from internationally recognized liver surgeons to share clinical perspectives and experience with approaches to complex liver procedures. With more than 800,000 people diagnosed with liver cancer worldwide each year¹, continued education and collaboration in liver surgery remain important for the treatment of patients with complex hepatobiliary conditions, including liver tumors.

Presenters include:

- Goro Honda, M.D., Ph.D., FACS, Department of Surgery, Institute of Gastroenterology, Tokyo Women's Medical University
- Adnan Alseidi, M.D., M.Ed., M.B.A., FACS, professor of surgery, University of California, San Francisco (UCSF) and specialist in liver, pancreas and biliary surgery

"The ACS Congress provides an important opportunity to engage with the surgical community and exchange perspectives," said Harvinder Singh, executive vice president and president, Specialty Surgery, Integra LifeSciences. "As we mark 20 years of CUSA within the Integra LifeSciences portfolio, we are proud of the role this technology plays in supporting surgeons globally. Integra LifeSciences remains focused on building upon proven technologies while addressing evolving clinical needs."

Conference attendees are invited to visit Integra LifeSciences at Booth 428 and participate in the company's Innovation Theater programming.

About CUSA® Clarity Ultrasonic Surgical Aspirator System

The CUSA Clarity Ultrasonic Surgical Aspirator System is indicated for use in surgical procedures where fragmentation, emulsification and aspiration of soft and hard (e.g. bone) tissue is desirable, such as neurosurgery, plastic and reconstructive surgery, orthopedic surgery, thoracic surgery, laparoscopic surgery, gynecological surgery, cardiac surgery and liver resection and transplant surgery.

About MicroFrance® Laparoscopic Instruments

The MicroFrance® laparoscopic manual surgical instruments are intended for use in a wide variety of surgical procedures, including laparoscopic and endoscopic procedures. The instruments are intended to scrape, cut, grasp, hold, remove, or manipulate tissue or structures.

About Integra LifeSciences

Integra LifeSciences (Nasdaq: IART) is a global medical technology leader dedicated to restoring lives. We are advancing transformational care through impactful innovation in neurosurgery and tissue reconstruction, specialized fields that demand exceptional expertise and precision. Our portfolio of highly differentiated, gold-standard technologies is trusted by healthcare professionals to deliver transformative care.
